Gypsies, Travellers and Travelling Showpeople – Policy LP28

19) Is the overall approach to this issue and Policy LP28 justified, effective and consistent with national policy?

Natural England's advice is that a minor amendment to policy wording should be made to ensure consistency with paragraphs 109 and 118 of the NPPF to protect the natural environment including designated sites. We recommend that an additional bullet is included to state:

- 'there will be no adverse impact on the natural environment including designated sites;'
